Company history/background

Good afternoon,

We are a cosmetic medicine clinic with over three years of experience and a large, established client base. There is no direct competition in the area, and we have a strong track record (even now, post-COVID-19). One of the partners is leaving, hence the sale of 50% of the shares.

We offer aesthetic medicine, advanced aesthetics, micropigmentation, osteopathy, acupuncture, and more... with the possibility of expanding into additional specialties. We have 5 treatment rooms available.

Unique selling points

We are located at 399 Alcala Street. A very busy area, an unbeatable location.

Other

We are looking for an investor or specialist in the field (doctor, nurse, beauty technician, etc.) to work alongside the remaining partner. Proactive team and excellent work environment.
