Confidential

**Company history/background**

Company founded in 1986 as a public limited company (SA) and converted to a private limited company (SL) after the 1992 reform. Stable clientele. Owned by the current proprietor since 2017. Business being transferred due to a conflict of interest between the administrator and owner.

It's a car repair and sales business (mechanic shop). The location is outside the town center (in an industrial

park) with excellent public transport connections.

The company has outstanding losses from previous years and fixed assets pending amortization. It has a stable business volume and a consolidated clientele, with growth potential due to its location in a high-purchasing-power area. The company possesses tooling that meets current standards for vehicle repair. The facilities where the business operates have the necessary licenses and comply with industry safety regulations. Rent is paid to a landlord for the use of these facilities.

Light vehicle maintenance

Electromechanical repair of light vehicles

New vehicle for sale

Used vehicle for sale

Intermediation in Leasing operations

### Unique selling points

The only facility where commercial and manufacturing activity takes place

### Other

The ideal buyer is someone looking to become self-employed to advance professionally and achieve the income they can't earn as an employee. Ideally, they should have a sales background and some administrative skills (or be able to connect with someone who does).
