Company history/background

Company with over 20 years dedicated to the manufacture and marketing of industrial pastry.

The business consists of:

- A 10,000 m2 plot with all municipal permits up to date to be able to carry out your activity.
- It has three fully equipped offices of approximately 150 m2.

Adjacent to the plot is another plot of approximately 14,000 m2, which is also available for sale should the future buyer be interested in a possible expansion.

The company offers a wide range of products with short shelf life (3 months), medium shelf life (6 months), and long shelf life (12 months). These products are divided into three groups: products with sugar, sugar-free products, and lactose-free products.

It has a very important diversity of clients, as well as a strong network of suppliers; the products are distributed under a trademark with its own proprietary title for a long time and it has its own distribution network.
