Company history/background

Founded in October 2002, we have 11 employees, 5,500 case files, and perform more than 150 assisted reproduction treatments annually.

We are located in a spacious and modern commercial premises of over 300 m2 on the ground floor, with a large 20-meter-long glass facade. It is situated on a commercial street in a residential and industrial area very close to

Madrid. So close, in fact, that it even has a metro connection.

All facilities have complete IT, environmental and security equipment.

For sale due to the owner's upcoming retirement.

Contracts with ALL insurance companies, including those for assisted reproduction services

Collaboration agreements as a supplier with other companies in the sector.

The asking price of €750,000 is open to some negotiation depending on the terms of sale that are negotiated.

All information is available and can be provided, including a 20-chapter sales dossier covering all aspects of the company. To receive it, a signed confidentiality agreement and a statement of interest are required.

The services currently offered are:

- Study of the infertile couple
- Artificial insemination with donor and partner
- In vitro fertilization
- Egg donation
- Preimplantation genetic diagnosis
- Oocyte vitrification
- Sperm bank
- Clinical analyses
- Medicine storage
- Psychology
- Gynecology
- Obstetrics

Other

There are two buyer profiles.

Renowned professional in the field of gynecology who buys and manages, as medical director, his own clinic.

An investor who buys the property and hires a medical director to replace the previous owner will obviously get a slower return on their investment, but it will still be a very worthwhile investment.
