Company history/background

We offer an extensive portfolio of forest land in Romania, ranging from 50 to 1,000 hectares, with the possibility to expand up to as much as 10,000 hectares. The properties are spread across Romania, primarily located in Transylvania (the Carpathian Mountains).

All plots are available with complete cadastral documentation. Buyers can choose between young and mature forests with a variety of tree species. These forest holdings are ideally suited for forestry, hunting, forest

management, and access to forestry subsidies.

The sale is handled by a Dutch real estate broker based in Romania, located in the heart of the country in Braşov. For more information or questions, please feel free to contact us via the contact button. We are happy to assist you with any inquiries.
