**Company history/background**

Limited company, with more than 25 years of history, fully consolidated, which develops its activity especially in the valve sector, serving the sectors of: Paper mills, Petrochemicals, Automotive, as well as nuclear power plants, carrying out its activity in an industrial building of 1,200m<sup>2</sup>, free of charges.

It has been operating in Spain since its inception, and from the 2022 fiscal year, it began making contacts to enter the French market, where it has already started to meet its objectives, invoicing clients from that country.

Machining of parts of all types and materials such as stellite, duplex stainless steel, Inconel, titanium, carbon steels, aluminum, etc., for the chemical, petrochemical, paper, automotive, and other industries, specializing in valves and their internal components for sectors such as nuclear, cryogenics, and gas. We offer the market what this sector requires: "Design, Price, and Delivery Time." In other words, quality work, a lower price than the customer would pay for in-house manufacturing, and a delivery time that fits their schedule.

## Unique selling points
