Company history/background

Business activity began in 2006, the reason for the sale or transfer of "know-how" was retirement without generational replacement.

The company's main activity is carrying out projects involving the lifting and relocation of structures, large or bulky loads, requiring specialized hydraulic self-climbing equipment, proprietary equipment, and patented designs. These types of projects are required by various sectors, including construction, industrial rehabilitation,

and the petrochemical industry.

Unique selling points

Currently, the area of operation is nationwide, with headquarters in the central region.

Other

Company specializing in auxiliary services and rehabilitation, industrial or construction assembly.
